

8 days, 7 nights

The background of the entire page is a warm, orange-toned photograph of a desert landscape. It shows rolling sand dunes under a clear sky. A small, lone figure of a person is visible on the crest of a dune in the middle ground, adding a sense of scale and adventure to the scene.

ROUTE SOUTH EGYPT

CHECK THE PROGRAM BELOW

DAEDALUS

80 km east of Marsa Alam, this isolated reef rises in the middle of the Red Sea, offering one of the most impressive dives of the world. Less than a km wide, the reef has colourfull walls full of corals and wide range of tropical species. As currents can be medium high, for the majority there are beautiful drift dives. Daedalus is especially known for scalloped hammerhead sharks, they move seasonal with highest chance to see them in the summer season. This is one of these areas where anything can happen... oceanic white tip reef sharks, grey reef sharks, a lonesome hammerhead shark or schools of them.

ELPHINSTONE

Wonderful deep walls rich with colorful hard and soft corals. It is recognised as great tropical reefs with a great majority of tropical species. Occasional encounters with bigger surprises as rays, turtles, napoleons, wrasse and dolphins make this stop to be always a surprise.

BROTHER'S

As part of the National Marine Park, these islands offer a breath taking mix of dives.

From wrecks to coral walls and a great abundance of large and small bade of fish- tuna, barracuda, snappers, jack fish as well as hammerheads, silky and oceanic white tips, occasional treasher shark and rays.

Big Brother is a 400 metre long island where we can also find Numidia wreck.

The north-west side of the island houses the wreck of the Aida. Little Brother hosts a very high concentration of life within a very small area. Fan coral forests, overhangs, hard and soft corals in a variety of astonishing colours.

With regular sightings thresher sharks, grey sharks and white tip reef sharks, at the right time of year.
